HISTORY OF THE DRILL SERGEANT

In late 1962, the Secretary of the Army directed Stephen Ailes, the Assistant Secretary, to conduct a survey of recruit training in the Army. This survey was conducted over a long period of time and included a wide variety of experienced personnel. To insure his report would be valid, Secretary Ailes made a comprehensive survey, comparing the training techniques of the Marines, Army, Navy, and Air Force. The final report, as submitted to the Department of the Army, contained five principle findings, with appropriate recommendations and suggestions for eliminating the problems encountered. The comparisons of the training centers of the three services with those of the Army demonstrated the attitude of the noncommissioned officers within the Army training centers was very poor. There were contributing reasons, including the long working hours, the difficulty of the demanding nature of the work and lack of free time for family concerns. Much of this was caused by inadequate staffing in the training centers. In addition, it was determined that the caliber of noncommissioned officers being assigned to the Army training centers was far below the standards required by the other services. Another problem was the negative attitude of the trainer which had a demoralizing affect on the trainee and resulted in a mental block between the recruit, and the trainer, and thus caused a negative impact on the qualified trainer and the quality of training presented. During the period April - June 1963, Pilot Trainer Courses were conducted at Fort Jackson, South Carolina, for selected officers and noncommissioned officers to participate in testing the revised concept of recruit training. Immediately following in July and August, this new training concept was tested with a training battalion at Fort Jackson and a training company at Ft Gordon, Georgia. The success of these tests resulted in the adoption of the new concept, to include the formation of Drill Sergeant Schools throughout CONARC. This was the beginning of the Drill Sergeant and was the first Drill Sergeant used to train recruits in the entire history of the recruit training programs throughout the Army. The Third U.S. Army Drill Sergeants School was officially given its name on 1 January 1967. The school has since been named the United States Army Drill Sergeant School.

CAMPAIGN HAT

A Veteran of numerous campaigns in the field, steeped in traditions, and in active service in various styles from 1850 through 1939, the campaign hat is a most appropriate symbol for a Drill Sergeant. The campaign hat appeared on the scene again in early 1964. The present style of the campaign hat, evolved from the straw or felt slough "Hardee Hat" of the 1850's through the center crease designs of the 1880's, to the present day modified "Montana Peak" which was adopted in 1911.

FEMALE DRILL SERGEANT HAT

In late 1971, Headquarters, Continental Army Command (CONARC) received approval from the Chief of Staff of the Army for permission to include women in the Drill Sergeant Program. In February 1972, six Women's Army Corps (WAC) Non commissioned Officers from Fort McClellan, Alabama were enrolled in the Drill Sergeant Program at Fort Jackson, South Carolina. Upon graduation, the women were authorized to wear the female drill sergeant hat. BG Mildred C. Bailey designed the female drill sergeant hat. The design was taken from the Australian bush hat. The first female drill sergeant hat was beige in color. The beige hat was replaced by a dark green female drill sergeant hat, style unchanged. The green hat was put in to use in January 1983. After the green drill sergeant hat appeared, the beige hat was slowly phased out of the system. IN 1982-85, a proposal was made for females to switch to the drill sergeant hat worn by male drill sergeants. Female drill sergeants at Training and Doctrine Command posts opposed this idea. In June 1985, General John A. Wichham Jr., Army Chief of Staff, stated that female drill sergeants will continue to wear the original female drill sergeant hat.

BADGE

The crest is the symbol of the Army Training Center. Before, 1958, it was the regimental crest with a maroon background. In 1958, it was adopted as the training center's crest and the background was changed to green. It was designed by the Heraldic Division of the Quartermasters General's Office. The 13 Stars represent the thirteen original Colonies. The snake is a symbol of preparedness and is grasping the scroll on one end with his mouth and the other end with his tail. On the scroll is printed the motto, "THIS WE'LL DEFEND", one of the many

mottos used in colonial days such as “DON’T TREAD ON ME,” “LIBERTY” and many others which were carried on flags and banners. The armored breastplate is a symbol of strength and the green background is a vestment worn under the armored breastplate. It is called a Jupon, which represents the Army. The torch is a symbol of liberty that shines over all.
